Hiring Manager

HR Business Solutions Corp (HRBSC) Kigali
Kigali, Rwanda

I am writing to express my interest in the **Full Stack Software Developer Trainee** position at BSC in Kigali. I hold a Bachelor's degree in Computer and Software Engineering and offer a robust foundation in backend and full-stack development, with a proven ability to adapt to new frameworks and integration challenges.

I am a highly versatile developer with a "backend-first" mindset. My technical toolkit includes:

- **Core Backend & Microservices:** Extensive experience with **Spring Boot** and **Node.js**. I also have practical experience using **Python and Flask**, particularly for **automated testing and unit testing**, ensuring that backend logic is reliable and production-ready.
- **Full-Stack & Mobile:** Advanced proficiency in **React, Next.js, and Tailwind CSS** for web, complemented by intermediate skills in **Flutter** for mobile development.
- **Data & DevOps:** Solid experience with **PostgreSQL, MySQL, and MongoDB**, allowing me to manage both structured and unstructured data effectively. I am also proficient in **Docker** containerization and **Git** for version control.

While my strongest background is in general Full-Stack and Backend architecture, I am deeply motivated to specialize in **AI/ML integration**. I am eager to apply my Python skills toward learning **MLOps pipelines** and supporting the integration of model inferences into web and mobile applications. My experience in testing has taught me to be meticulous, a trait I believe is essential when evaluating and monitoring ML model outputs. I am a proactive learner and an adaptable engineer who can quickly master any framework required. I look forward to the opportunity to grow under the guidance of senior engineers at BSC and contribute to your team's innovative goals.

Thank you for your time and consideration.

Kind regards,

IMANARIYO BAPTISTE Full Stack Software engineer
